43 NSNs - Electrical Devices

The purpose of this solicitation is to provide worldwide support for the National Stock Numbers (NSNs) listed in Attachment 1. The contractor shall function as a source of supply for the NSNs on this contract to consistently deliver parts to the DLA Depots. The NSNs represent Federal Supply Class (FSC) 5975. The applicable NAICS is 335999. The NSNs will be evaluated on a line-by-line basis and awarded to the apparent successful offeror based on a best value determination. Contractors may quote on as many NSNs as they have the capability to perform. The contract(s) awarded will be Indefinite Delivery Indefinite Quantity type contract(s). The solicitation contains a two-year base period with three one-year option periods.

The Contracting Officer intends to evaluate proposals in accordance with the evaluation factors set forth in section M of the solicitation. In accordance with clause L39E, 52.215-1, contracts will be awarded without discussions. However, the Government reserves the right to conduct discussions if the Contracting Officer later determines them to be necessary. Contracts will be awarded on a NSN by NSN basis in the following order:

- A. NSNs that do not require discussions will be awarded first.
- B. NSNs that do require discussions will be awarded in subsequent phases.

System Interface and Integration: Delivery Orders will be issued to the contractor through the Paperless Ordering Placement System (POPS), Automated Delivery Orders (ADO) or manual orders. If POPS is selected as the automation method, in accordance with Clause C3, 52.211-9G33, POPS - Computer Compatibility, the contractor shall establish interface capability with DLA's Standard Automated Material Management System (SAMMS) and Defense Automated Addressing System (DAAS). These interfaces will be for purposes of sending and receiving EC/EDI transmissions, electronic invoices and/or receipt transactions processing, and establishing two-way communication for logistics and management information. The Contractor shall ensure adequate systems interfaces are used to integrate commercial systems with Government systems for the entire logistics trail. If ADO is selected, the Contractor is required to have Internet capability to receive email notification that an order is available on the Procurement Gateway. Manual delivery orders would be issued for contractors unable to utilize an automated process and for items requiring first article testing, government furnished tooling, or for other special or unique requirements.

Pricing: The Contractor is to provide pricing for the base period and option periods. Attachment 1 identifies the NSNs, maximum order quantities, minimum order quantities (MOQ) and estimated annual quantities (EAQ) for the base period and option periods. The EAQ for each year in the base period is provided; however, evaluations will be based on the total for the two years. Please provide contractor pricing on this spreadsheet. Contractors are not required to honor orders for quantities less than the MOQ [see clause I67, 52.216.19]. However, it is important to note that offers will be evaluated based on the EAQ [see clause M12, 52.216-9G09]. These numbers are based on the best projection available at the time of this solicitation and are subject to change.

**Vendors are required to submit pricing in an electronic format (spreadsheet) either through e-mail or on a disk to help expedite the evaluation process.

Evaluation: Evaluation will be on a line-by-line basis. Each individual NSN will be evaluated by multiplying the proposed unit price for each period (e.g. base and option periods) times the EAQ for that period to arrive at the estimated total for each NSN. The total evaluated price for each NSN will be the sum of the total evaluated price for the base period and option periods plus any additional proposed costs to include First Article Testing (FAT), Surge and Sustainment per clause M19CA, and other non-recurring costs, if applicable.

I71, 52.216-22, Indefinite Quantity: The guaranteed minimum contract value is defined as 10% of the estimated value of the two-year base period. The minimum will not guarantee orders for any particular item or group of items. The Government will not guarantee a minimum for the option periods. In the event of a split award, the Government will compute a different guaranteed minimum and maximum contract value for each contract awarded under this solicitation.

The guaranteed minimum value will be determined in accordance with the following formula:

$$0.1 \times ([\text{NSN1 price} \times \text{Total Est. Demand Qty}] + [\text{NSN2 price} \times \text{Total Est. Demand Qty}] + \text{etc...})$$

The maximum contract value is defined as 150% of the estimated value of the base period or each option period. The maximum contract value will be determined in accordance with the following formulas:

Base Period: $1.5 \times ([\text{NSN1 price} \times \text{Total Est. Demand Qty}] + [\text{NSN2 price} \times \text{Total Est. Demand Qty}] + \text{etc...})$

Option Periods: $1.5 \times ([\text{NSN1 price} \times \text{EAQ}] + [\text{NSN2 price} \times \text{EAQ}] + \text{etc...})$

Delivery: The contractor shall deliver to the DLA distribution depot as designated on each DO. The contractor shall ship ordered items on or before the required contract delivery date specified in the DO. The required delivery days for each NSN are indicated in Attachment 1.

Delivery shall be FOB destination. The Contractor shall consolidate shipments from the same source to the same destination whenever possible.

Surge and Sustainment (S&S): S&S NSNs are identified in Attachment 2. S&S requirements are outlined in clauses I89F, 252.217-9006 and I92L, 52.217-9G25 in

Section I, in instruction L59DA, 52.217-9G26 in Section L, and in M19CA, 52.217-9G27 in Section M. In the attachment, the individual quantity requirements for each month are identified as well as the total six-month requirement per NSN. "Surge Support" is one of the evaluation factors; therefore, offerors are required to comply with the specific clauses/provisions.

Offerors who submit proposals on NSNs with surge requirements are required to provide a plan of their proposed approach to meeting the S&S requirement. Sample S&S plans can be obtained at www.dscr.dla.mil/kd. Offerors are required to provide surge unit pricing on Attachment 2. Offerors that fail to provide the required information for these select NSNs or submit proposals that are deficient may be rejected.

The 6000 series CLINs identify the surge quantity that may be ordered by the Government in a military contingency. The Government is not obligated to order any of the surge quantities and the contractor should not ship such quantities without receipt of an order clearly designated for surge quantities.

Quality: The contractor shall establish, implement, document and maintain a quality system that ensures conformance to all contractual requirements and meets the requirements of ISO 9001:2000. However, the contractor may propose an equivalent quality system model. If the contractor chooses to propose an equivalent quality, the clause in E5 - 52.246-11 - Higher Level Quality Requirements must be completed.

The Quality Matrix, Attachment 3, includes columns that provide information to supplement the requirements stated in the PID. In the event that a conflict exists between these two documents, the PID shall be the prevailing requirement. The Quality Matrix Appendix, also included with Attachment 3, designates which contract clauses apply to each quality requirement and provides references and handbooks that decode the various quality codes.

First Article Testing (FAT): First Article NSNs are identified in Attachment # 4. Contractor FAT applies to 15 NSNs on this solicitation and are in the 9907 CLIN series.

Testing & Evaluation Time: 45 days

FOB: Destination; Inspection at Origin, Acceptance at Destination

Please see the Procurement Identification Descriptions (PID) for more details on FAT.

Packaging Requirements: Attachment 5 includes the Procurement Identification Descriptions (PID) obtained from the Contract Technical Data File (CTDF). Refer to the individual PIDs for specific packaging requirements.

Surplus Offers: Surplus offers will not be considered for award as it is unlikely that offerors will be capable of providing surplus material for the life of the contract.

Access to Technical Data Packages: Items shall be manufactured in accordance with Government technical data packages, specifications, and drawings. The contractor may obtain technical data packages using the following websites:

<http://www.dscr.dla.mil/tdmd> - Contractors must have a membership number to access technical data. Contractors must follow the instructions provided on this website to obtain a membership number and technical data.

<http://assist.daps.mil> and/or <http://dodssp.daps.mil> - Contractors can use these sites to download Military Specifications (MIL-SPEC) and Federal Specifications (FED-SPEC).

The Contractor is responsible for notifying the Government if the drawings or technical data is different from the information cited in the PID.

NOTE: The following documents can be downloaded from the DSCR website at
<http://www.dscr.dla.mil/kd>.
