12. REMARKS

The engineering organization that manages this item is not reasonably assured that this contractor can produce a product that conforms to all contract requirements for acceptance. We have therefore determined that the contractor must demonstrate the capability to produce an acceptable item IAW FAR 9.303, and AFMCI 64-110.

Demonstration of the contractor's ability, prior to production as provided only by First Article (F/A) testing, is also necessary since it provides significant benefits to and protects both the Government and the contractor. When deficiencies are not found until after production has started the flexibility to correct data errors, material deficiencies, manufacturing errors, etc., without significant impact, is lost. If contract termination becomes necessary, major litigation would be involved.

FIRST ARTICLE JUSTIFICATION, A FIRST ARTICLE TEST/INSPECTION IS REQUIRED DUE TO THE FOLLOWING:

- Critical to: Safety / Operations / Mission Application / Use.
- First Competitive Procurement (data unproved)
- Contractor previously furnished item but:
 - a. Have had changes in processes
 - b. Production discontinued for extended period
 - c. Product under previous contract developed problems
- Product described by performance specification.
- Product has Government Industry Data Exchange Program report
- Initial Production Evaluation (IPE) will not be considered as proof of production capability
- Product associated with complex manufacturing process:
 - a. Forging, Casting, Extrusion.
 - b. Close tolerances, Precision machining
